

1 This listing of claims will replace all prior versions, and listings, of claims
2 in the application.

3
4 **Listing of Claims:**

5
6 Claims 1-26 (cancel)

7
8 Claim 27 (New): A camera installation comprising:

9 a camera device capable of taking a photographic image data capturing an
10 image over a field area of a size capable of containing at least one human
11 individual;

12 an activation device for activating said camera device to capture a said
13 photographic image data;

14 a user portable identification device carrying a unique identifier data for
15 identifying a user of said camera installation;

16 a data entry device capable of receiving data identifying said user, and a
17 users account data, the data entry device being provided in close physical
18 proximity to said camera device; and

19 a user portable registration data storage device, configured for transmission
20 of user registration data and account data to said data entry device;

21 wherein said data entry device is operable for collecting said registration
22 data and said user account data in a single operation, and an action of said
23 activation device activating said camera to capture an image automatically creates
24 a contract for the supply of said image.
25

1 Claim 28 (New): The camera installation as claimed in claim 27,
2 wherein said activation device is configured to automatically activate said camera
3 on entering said field area.

4
5 Claim 29 (New): The camera installation as claimed in claim 27,
6 wherein said activation device is operable by a user to activate said camera.

7
8 Claim 30 (New): The camera installation as claimed in claim 27,
9 wherein said activation device is configured to store registration data describing
10 personal details of said user.

11
12 Claim 31 (New): The camera installation as claimed in claim 27,
13 wherein said activation device is configured to store user financial account data
14 which is transferable to said data entry device.

15
16 Claim 32 (New): The camera installation as claimed in claim 27,
17 wherein said activation device comprises a hand held computer entity.

18
19 Claim 33 (New): The camera installation as claimed in claim 27,
20 wherein said identification device is passively interrogated to read said unique
21 identifier data when in close physical proximity to said data entry device.

22
23 Claim 34 (New): The camera installation as claimed in claim 27,
24 wherein said registration data storage device is configured to store registration
25 data describing personal details of said user.

1
2 Claim 35 (New): The camera installation as claimed in claim 27,
3 wherein said registration data storage device is configured to store user financial
4 account data, which can be transferred to said data entry device.

5
6 Claim 36 (New): The camera installation as claimed in claim 27,
7 wherein said registration data storage device comprises a hand held computer
8 entity.

9
10 Claim 37 (New): The camera installation as claimed in claim 27,
11 wherein said data entry device comprises a radio receiver capable of receiving
12 digital data uniquely identifying a user.

13
14 Claim 38 (New): The camera installation as claimed in claim 27 any one
15 wherein said data entry device comprises a keypad having a plurality of
16 alphanumeric keys, by which a user may enter text data by activating said
17 alphanumeric keys.

18
19 Claim 39 (New): The camera installation as claimed claim 27, further
20 comprising a visual display device, said visual display device displaying an
21 operation menu, configured to prompt a user to understand operation of said
22 camera installation.

1 Claim 40 (New): The camera installation as claimed in claim 27,
2 wherein said camera installation is enclosed in a weather proof casing, for outdoor
3 use.

4
5 Claim 41 (New): The camera installation as claimed in claim 27,
6 comprising a self-supporting casing capable of free-standing installation.

7
8 Claim 42 (New): A photographic service system comprising:
9 at least one camera installation for capturing photographic digital image
10 data in response to an input signal generated by a person; and

11 at least one service provider computer entity, configured to receive said
12 image data from said camera installation, receive user registration data describing
13 personal details of a user, and receive delivery address data specifying a delivery
14 destination for delivery of a photographic product;

15 said camera installation comprising:

16 a camera capable of taking a photographic image data capturing an image
17 over a field of view capable of containing at least one human individual;

18 at least one activation device for activating said camera to capture a said
19 photographic image data;

20 a data entry device capable of receiving data identifying said user, and a
21 users account data, the data entry device being provided in close physical
22 proximity to said camera device;

23 a user portable registration data storage device configured for transmission
24 of user registration data and account data to said data entry device; and
25

1 wherein said camera installation is operable for collecting said registration
2 data and said user account data in a single operation; and

3 an action of activating said camera to capture an image automatically
4 creates a contract for the supply of said image, by said at least one service provider
5 computer entity.

6
7 Claim 43 (New): A photographic service system as claimed in claim 42,
8 wherein said at least one service provider computer entity is configured to:

9 receive user account data describing financial account data of a user; and
10 send said account data to a financial institution for effecting payment of a
11 monetary amount from said user.

12
13 Claim 44 (New): A method of providing photographic images to a user
14 specified destination, said method comprising:

15 capturing photographic digital image data in response to an input activation
16 signal;

17 receiving a unique identifier data identifying a user of a camera installation;
18 and

19 receiving user registration data describing personal details of a said user;
20 wherein an action of activating capture of an image automatically creates a
21 contract for the supply of said image.

22
23 Claim 45 (New): The method as claimed in claim 44, further
24 comprising:
25

1 collecting electronic account data describing a financial account of said
2 user person; and

3 using said electronic account data and electronic user registration data to
4 collect payment for said supply of said image.

5
6 Claim 46 (New): The method as claimed in claim 44, further
7 comprising:

8 collecting delivery destination data specifying a delivery destination of an
9 image; and

10 delivering a said image to said destination specified by said delivery
11 destination data.

12
13 Claim 47 (New): The method as claimed in claim 44, further
14 comprising:

15 collecting delivery destination data specifying a delivery destination of an
16 image; and

17 delivering an electronic image data file to a specified electronic said
18 delivery destination.

19
20 Claim 48 (New): The method as claimed in claim 44, further comprising
21 collecting delivery destination data specifying a delivery destination of an
22 image;

23 delivering a said image to said destination specified by said delivery
24 destination data;

1 transmitting said photographic image data between first and second
2 computer entities as electronic data;

3 at said second computer entity, converting said photographic image data
4 into a physical photographic print; and

5 physically delivering said physical photographic print to a physical said
6 delivery destination.

7
8 Claim 49 (New): The method as claimed in claim 44, further
9 comprising:

10 sending said electronic account data describing an account details of a said
11 user, to a third party computer entity; and

12 collecting a payment from said third party computer entity.

13
14 Claim 50 (New): The method as claimed in claim 44, wherein said
15 photograph image data is generated in response to an input signal received in close
16 physical proximity to a site of capture of said photograph image data.

17
18 Claim 51 (New): The method as claimed in claim 44, further
19 comprising:

20 collecting electronic user registration data;

21 collecting electronic account data, and

22 collecting delivery destination data by:

23 transmitting said electronic user registration data, electronic account data
24 and delivery destination data from a hand held computer entity device held by said
25

1 user, to a camera installation comprising a camera which generates said
2 photograph image data.

3
4 Claim 52 (New): The method as claimed in claim 44, wherein a said
5 photographic image data comprises a sequence of video images.

6
7 Claim 53 (New): The method as claimed in claim 44, further comprising
8 the processes of:

9 collecting personalised message data from said user; and
10 delivering a message contained in said message data, to a delivery
11 destination, together with said image.

12
13 Claim 54 (New): The method as claimed in claim 44, further comprising
14 the process of displaying a photographic image data on a web site.

15
16 Claim 55 (New): The method as claimed in claim 44, further comprising
17 the process of:

18 displaying a photographic image data on a web site; and
19 downloading a said photographic image from said web site to a remote
20 computer entity.

21
22 Claim 56 (New): A camera installation comprising:
23 a camera capable of taking a photographic image data capturing an image
24 over a field area of a size capable of containing at least one human individual;
25

1 an activation device for activating said camera device to capture a said
2 photographic image data;

3 a user portable identification device carrying a unique identifier data for
4 identifying said user; and

5 a data entry device capable of receiving data identifying a user of the
6 camera installation, the data entry device being provided in close physical
7 proximity to said camera device;

8 wherein said data entry device operates to receive an identification signal
9 from said user portable identification device, uniquely identifying said user, and to
10 determine whether an image of said user corresponding to said user identification
11 data is instructed to be captured; and

12 if as a result of said determination, said image is instructed to be captured,
13 said camera operates in response to said signal received from said activation
14 device to capture an image of said person carrying said user portable identification
15 device,

16 wherein activation of said camera to capture said image automatically
17 creates a contract for the supply of said image.

18
19 Claim 57 (New): The camera installation as claimed in claim 56,
20 wherein a hand held computer device transmits said personal data to said data
21 entry device.

22
23 Claim 58 (New): The camera installation as claimed in claim 56,
24 wherein said personal data comprises data selected from the set:
25

1 user name; user address; user bank account details; physical delivery
2 address for photograph images; and electronic delivery address for photograph
3 images.

4
5 Claim 59 (New): A method of providing photographic images to a user
6 specified destination, said method comprising:

7 automatically capturing a said image using a digital camera in response to
8 an input signal received from a user portable activation device, when said
9 activation device appears in close physical proximity to said digital camera;

10 collecting electronic user registration data, describing a name and address
11 of a user person, said electronic user registration being collected at a data entry
12 device provided in close physical proximity to said camera;

13 collecting delivery destination data specifying a delivery destination of an
14 image;

15 collecting electronic account data describing a financial account of said
16 user person;

17 using said electronic account data and electronic user registration data to
18 collect payment;

19 collecting personalized message data; and

20 delivering a said image, and a message containing said personalized
21 message data to said delivery destination specified by said delivery destination
22 data.

1 Claim 60 (New): The method as claimed in claim 59, wherein said
2 process of delivering said image comprises delivering said image data over a
3 wireless link to a handheld computer device.
4

5 Claim 61 (New): The method as claimed in claim 59, wherein said
6 process of delivering said image comprises delivering an electronic image data file
7 to a specified electronic said delivery destination.
8

9 Claim 62 (New) The method as claimed in claim 59, wherein said
10 process of delivering said image comprises transmitting said digital image data
11 between first and second computer entities as electronic data;

12 at said second computer entity, converting said digital image data into a
13 physical photographic print; and

14 physically delivering said physical photographic print to a physical said
15 delivery destination.
16

17 Claim 63 (New): The method as claimed in claim 59, further comprising
18 sending said electronic account data describing an account details of a said user, to
19 a third party computer entity; and collecting a payment from said third party
20 computer entity.
21

22 Claim 64 (New): The method as claimed in claim 59, wherein said steps
23 of collecting electronic user registration data, collecting electronic account data,
24 and collecting delivery destination data comprises transmitting said electronic user
25 registration data, electronic account data and delivery destination data from a hand

1 held computer entity device, to a camera installation comprising a camera which
2 generates said digital image.

3
4 Claim 65 (New): The method as claimed in claim 59, wherein a said
5 image comprises a sequence of video images.

6
7 Claim 66 (New): The method as claimed in claim 59, further comprising
8 collecting personalized message data from said user; and delivering a message
9 contained in said personalized message data, to said delivery destination, together
10 with said image.

11
12 Claim 67 (New): The method as claimed in claim 59, further comprising
13 displaying a said image on a web site.

14
15 Claim 68 (New): The method as claimed in claim 59, further comprising
16 the steps of:

17 displaying a said image on a web site; and downloading said image from
18 said web site to a remote computer entity.

19
20 Claim 69 (New): The method as claimed in claim 59, further comprising
21 downloading said image to a hand held personal computer device.

22
23 Claim 70 (New): A photographic service system comprising:
24 at least one camera installation for automatically capturing photographic
25 digital image data in response to an input signal;

1 at least one service provider computer entity configured to electronically
2 receive said image data from a said camera installation, receive user registration
3 data describing personal details of a user and receive delivery address data
4 specifying a delivery destination for delivery of a photographic product;

5 said camera installation comprising a camera capable of capturing digital
6 photographic image data capturing an image over a field area of a size capable of
7 containing a plurality of human individuals; a user portable activation device for
8 activating said camera device to capture a said photographic image data, said
9 activation device carrying a unique identifier data for identifying said user; and a
10 data entry device capable of receiving data identifying a user of the camera
11 installation, the data entry device being provided in close physical proximity to
12 said camera device;

13 said at least one service provider computer entity configured to
14 electronically receive said image data captured by said camera installation; receive
15 delivery address data specifying a delivery destination for delivery of a digital
16 image product; receive user account data describing financial account data of a
17 user; send said digital image data to a destination specified by said delivery
18 address data; and send said account data to a financial institution for effecting
19 payment of a monetary amount from said user.

20
21 Claim 71 (New): The digital image service system as claimed in claim
22 70, further comprising a hand held computer device, capable of downloading
23 image data from said camera.
24
25
